Software Engineer

Vadodara, IN (+91 8160465102)

With over 1.5 years of experience, I am a software engineer usually dealing with JavaScript. Well versed in building responsive and elegant web designs, and related frontend/backend frameworks, seeking a full-time role to further improve the skillset while at the same time contribute to the organization as well as the developer community.

## Work Experience

**Software Engineer - Imriel**

May, 2023 - Present

- Working on an enterprise application related to the management of legal entities of a business. Mainly working with Node, NestJS, PostgreSQL and Docker leaning more towards the backend side.
- Re-designed the backend architecture to support storing multiple client data into a single PostgreSQL database instance in a multi-tenant architecture. Tackled massive performance issues due to this change.

**SWE Intern - Imriel**

Jan, 2023 - May, 2023

- Worked on React, Typescript, MUI and Jest as a Frontend Software Engineer.

**Creator - Syntackle**

Feb, 2022 - Present

- Built a blog from scratch using 11ty with some progressive JS. Gulp, Rollup, PostCSS are also a part of the build process. It's mainly a software development blog covering topics & tutorials related to the web, CSS, JavaScript, dev tools, Jamstack, serverless and much more. - [syntackle.com](https://syntackle.com)

## Projects

- Syntackle** - A developer blog built using a static site generator named 11ty.
- Wavy** - A JavaScript library which allows you to animate infinite words in an infinite loop in a modern wavy way!
- rssed** - A collection of RSS feeds of hundreds of independent developers as well as publications which updated itself everyday.
- Contact Card** - A digital business contact card generator which is quick to share.
